

Simple. Effective. Proven.

The Root Intrusion Solution.

Roots can clog pipes causing blockages and sewer overflows.

RootX is the **original**, non-metam sodium foaming root control in an easy-to-apply powdered formulation. It foams on contact with water to kill roots and inhibit regrowth.

RootX attacks and kills the roots.

- RootX enhances mechanical removal effectiveness
- RootX sticks to the roots and the pipe walls to kill the roots and inhibit regrowth
- More cost-effective than mechanical removal
- The RootX formula makes any applicator a root control professional

RootX removes virtually all the roots, restoring pipeflow capacity.

- No copper sulfate or metam sodium
- Effective directly from the package or with existing equipment
- Does not harm the treatment plant or surrounding environment

"Your product saved my budget thousands of dollars..."

—M. Bean, Evansville Housing Authority

"RootX is a staple in our service business."

—Joe McPerson, Kogge, Inc.

"We find (RootX) to be a cost-effective aid in our continuing root abatement program."

*—Robert D. Mills, Wastewater Collections Supervisor,
Kitsap County, WA*

RootX is accepted in all 50 states by the EPA for use in sewer and storm lines.
And it's guaranteed effective!

The RootX Advantages.

• = Yes!

Simple

	RootX	Root-Cutting Only	Other Foaming Products	Copper Sulfate
Safe to handle	•			
Prepackaged for easy application	•			•
Ready to use - just add water	•	•		•
Treats intrusion in 30 minutes or less	•			•
Uses existing equipment	•	•		
Saves labor costs	•			
Easily added to pipe maintenance programs	•			
Provides quick and easy root control	•			
Sold online	•			•

Effective

Kills roots on contact	•		•	•
Foaming action coats pipe walls	•		•	
Prevents regrowth	•			
Strips away grime to penetrate roots	•		•	
Reaches top of pipe—and roots	•		•	
Uses aquatic herbicide	•			
Speeds decay of root debris	•			

Proven

EPA accepted in all 50 states for sewer and storm lines	•			
Safeguards sewers and waste treatment plants	•	•		
Safe for septic systems	•	•		
Protects plants and trees	•	•		
Enhances bacterial growth	•			
Doesn't contain copper sulfate or metam sodium	•	•		
Prevents pipe damage from cutting	•			
Non-caustic	•			

Using an FDU attached to a standard jetter truck, the unique foaming action fills the pipe to reach all of the roots.

Before

After

Actual TV'd pipes before RootX treatment and after 6 months.

RootX solves the number one problem facing municipalities and professional plumbers... pipeline root intrusion.

Unique Foaming Action

With a unique foaming action, RootX reaches the top of the pipe where 90% of root intrusion occurs. Surfactants strip away grime and grease on roots, and an EPA-accepted herbicide kills them on contact. RootX enhances natural decomposition and root debris removal. Surrounding plants and trees are unharmed.

RootX Tool Kit

Includes the FDU 100 application device (Foam Dispersal Unit), two 20 lb. bags of RootX, masks, gloves and transfer tube.

Conveniently prepackaged for easy application through a manhole, toilet, or sewer cleaning machine, the root-killing foam is activated when you just add water.

RootX is guaranteed to eliminate blockages and overflows caused by roots.

Ideal for professionals

RootX is available in 2 lb. and 4 lb. jars for smaller diameter pipes and for easy application through a toilet or into a septic tank.
