Improving Energy Efficiency While Reducing Energy Costs

GreenPolyiso.com is the official "Green" website for Atlas Roofing Corporation. This site was designed to give visitors an understanding of what Atlas represents and how using Atlas products can help you go green in your building projects.

The term "Green Polyiso" refers to Environmentally Friendly, Zero Ozone Depleting, Zero Global Warming Potential polyisocyanurate insulation material. Atlas manufactures "Green Polyiso" insulation materials for a variety of different building applications, including low slope roofing systems, sheathing for residential side walls, cavity wall for residential and commercial applications and available roofing systems. The Atlas line of polyiso insulation materials is called Atlas ACFoam®. All ACFoam® products consist of state-of-the-art polyiso foam with superior fire performance characteristics and the ability to retain high R-values.

Atlas recognizes the challenges the building industry faces when dealing with environmental issues; Atlas has done much more than simply adapt as industry trends have shifted, Atlas has been a leader in looking for new ways to push the envelope. Atlas is an established force in the building materials industry that strives to push innovation and responsibility in its business and manufacturing processes.

Get Educated, Get Credit

Atlas offers several AIA Registered Learning Units to help interested parties achieve much needed industry information and updates while obtaining needed CEU credits. Atlas will foster a presentation to meet the needs of your group, instructed by one of our many knowledgeable technical experts. **Contact us today for more information!**
