

Dust Suppressant — Dustnet

Any of abrasives with DS2000 in the product name have been treated with TC1210 Dustnet. This is a revolutionary product on the cutting edge of technology to reduce nuisance and respirable dust.

Features:

- DS2000 reduces nuisance dust up to 97% during handling; in blasting applications it reduces respirable dust up to 76% and visible dust to 50%.
- Does not affect cohesion of coatings as tested by KTA – TATOR of Pittsburgh, PA
- Continues to work on spent abrasive for low-dusting clean up
- Is non-hazardous – requires no special disposal requirements
- Settles dust closer to the blast site
- Safer, cleaner workplace with increased productivity

NOTE: You can have any of the abrasives listed below coated with DS2000

- * All Sand Products
- * All Kleenblast Products

To order these products with our Dust Suppressant, just ask for your abrasive with DS2000.

Available in Bulk, Bulk Bags, 40Kg. bags or 22.7Kg. Bags
