Weep Holes - 343

[larger image](#)[larger image](#)

The 343 weep hole, made from injection-molded flexible PVC, creates an unobstructed passage for water and moisture to exit masonry cavity walls.

The 343 weep hole features:

- A rectangular closure strip that prevents mortar droppings from clogging openings
- Compressible flanges for joint widths of 1/2"-3/4"

DIMENSIONS/COLORS:

- 2-1/4", 2-7/8" or 3-1/2" tall
- Available in grey
