## Enviroflex

Nilex Enviroflex linear low density polyethylene (LLDPE) provides much of the same durability and resistance properties found in high density polyethylene (HDPE), but with the added benefit of increased material flexibility because it is a lower-density polymer.

[Enviroflex 20 mil Specifications](#)

[Enviroflex 30 mil Specifications](#)

[Enviroflex 40 mil Specifications](#)

This increased flexibility makes Enviroflex well suited to pre-fabrication into large panels, minimizing field work. Additionally, Enviroflex is often used in applications where long-term large settlements may be anticipated, such as landfill covers.
