What is CSI format?

This section of the Xypex Specification utilizes the Section Format™ of the Construction Specifications Institute (CSI) Manual of Practice®.

CSI Format is available for the following:

[Coating](#) | [Dryshake](#) | [Additive](#)

Section Format provides a uniform approach to organizing specification text by establishing a structure consisting of three primary Parts: General, Products, and Execution. Text within each of the three Parts is divided into articles and subordinate paragraphs and subparagraphs. The article titles serve as a checklist for consideration by the specifier. These titles are optional and selections should be based on appropriateness for the specific situation being addressed. CSI is a U.S.A. based professional society for the specifications community. Xypex Chemical Corporation is aware that other organizations with different but equally valid specification formats are available and utilized by specifiers in different parts of the world.

Contact Xypex representatives for alternative formats that incorporate local requirements and standards.
