

Product Data Sheet

Allied Reusable Insulation Covers

Allied Reusable Insulation Covers are designed as a long term insulation solution for process piping and equipment which requires periodical maintenance or inspection.

Features of ALLIED Reusable Covers

- Reusable flexible & durable.
- Quick fastening & release system.
- Chemical & flame resistant materials.
- Identification labels with serial number for replacement or duplication.

Reduce Insulation Time

- ALLIED covers take only minutes to install.

Waste Reduction

- ALLIED covers can be re-installed, which reduces waste disposal.

Custom Design

- ALLIED covers are custom tailored to each application.

Broad Range of Applications

- Depending on the application, ALLIED covers can be designed to withstand process temperatures from ambient temperatures to 1260°C (2300°F).

Reduce Operating Costs

- ALLIED covers can increase operating efficiency through heat conservation.
- ALLIED covers can be used throughout multiple maintenance cycles.

Design Effectiveness

- Thorough consultation with the customer for seamless integration of insulation blankets and pipe covering (insulation cut-back standards, treatment of elbows, etc).
- Form fitting covers to maximize heat conservation.
- Cone reducers to provide a tight seal to the adjacent pipe cover insulation (used where the pipe cover is 3" dia. smaller than the flange).
- Wing-style covers can be utilized on valves of 3" or smaller (cost effective and form-fitting one-piece cover).
- Designed to minimized gaps between body and bonnet pieces.
