

# Easy-To-Install Renovation Treads Renew Safety on Worn and Slippery Stairs

## MAKE SLIPPERY STAIRS SAFE AGAIN

Renovate and update any stairway without the costly labor of removing and rebuilding the old stair. American Safety Tread offers a variety of impact-resistant renovation treads for every condition.

## FOR ANY LOCATION

Renovation treads install easily over worn stairways of every type including concrete, wood, steel, marble and terrazzo. They can be used inside and out and are ideal for heavy traffic stairways.

## FAST EASY INSTALLATION

Renovation treads are delivered and countersunk, ready for immediate installation by anyone who can handle a screwdriver. This installation-ready feature eliminates the greatest expense for stair repair, the need for professional labor.

## LASTING BEAUTY AND PROTECTION

The attractive colors of our renovation treads renew old, worn stairways. Drab and unsafe stairs become bright and contemporary with anti-slip protection at every step.

## NEW VISION-LINE

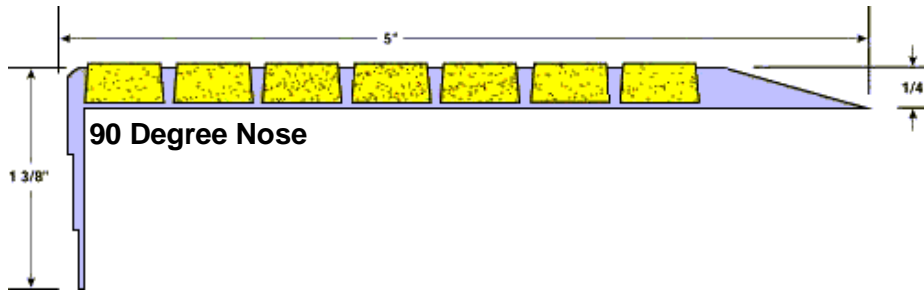

American Safety Tread Vision-Line highlights the leading edge of each tread, providing visibility going down steps even in dimly

lit places. The Vision-Line is
